Neuronavigation

Product overview

MAG & More joins neurocare.

What is unique about our products and company?

Highest quality “Made in Germany”

Our products are designed and manufactured in Germany (in Bavaria to be exact) to ensure the highest product quality and reliability (please find more information about our company towards the end of this catalogue).

Many CE cleared clinical indications

Our TMS systems are evaluated to treat many indications, including depression, anxiety / PTSD, incontinence, migraine, pain, paresis, schizophrenia, stroke or tinnitus.

Setting the technical standards

Our PowerMAG stimulators are the most powerful in their class, the treatment coils are remarkably quiet, light and durable, and the devices are controlled by a TMS software with patient and protocol management capabilities – to name some of the features with which we are setting the technical standards.

Service and training

We understand that the hard product is only as good as soft product around it. Included with our systems is an elaborate TMS training at the customer site, and we pride ourselves on fast and extensive service when required.

View! Neuronavigation

Complete turn-key solution

part-no.: 940450

Consisting of:

- Individual Cart which allows for flexible Camera positioning
- All-in-one PC
- IR Camera "Vicra"
- Foot switch
- 1x Pointer, 1x Coil tracker, 1x Head tracker,
- 1x MAG & More head-tracker-clamp
- 25 pcs of IR-reflecting silver spheres
- PowerMAG View! software CD
- PowerMAG View! software license
- Compatible with all MAG & More coils and most other commercially available system

Possible services include:

- Shipping, including packaging and insurance
- On-site installation by our personal
- On-site system instruction and TMS hands-on training by TMS expert
- Full 24 month warranty

Key technical features of the View! Neuronavigation

NDI Vicra Camera

The Polaris Vicra tracks 3D positions with sub-millimetre measurement accuracy and repeatability. The most subtle coil and head movements are precisely tracked and localized in real-time, with volumetric accuracy to 0.25 mm and 95% confidence interval of 0.5 mm.

PowerMAG View! Software powered by BrainVoyager

The PowerMAG View! software is powered by the well-established BrainVoyager software, a market leader in neuroimaging. The software creates full 3D models of the head and the brain, and assists you step by step through its workflow. It is possible to use template heads, and the functions are numerous. The result is a software that is powerful enough for challenging research applications, while being easy enough to use for daily clinical sessions.

Compatible with different (f)MRI data formats such as DICOM or NiftI.

Individual Cart & All-in-one PC

Our medical grade cart ensures you have full flexibility when operating the neuronavigation system – while also providing an innovative design. The camera is mounted on a movable arm, and the all-in-one PC provides an optimal hard- and software platform.

No Disposables

The View! Neuronavigation does not entail any disposables or other components that result in continuous costs.

Terms & Conditions:

CE mark: Export and sales to countries not accepting the European CE-certification according to MDD 93/42/EEC are at the sole liability of the buyer. The intended user group is determined by the manufacturer and needs to understand English product labeling and instructions for use.

Warranty: A full 24 month warranty is granted on the entire system, assuming proper handling of the system as presented in the technical instruction or manuals. This warranty will start after the system was successfully installed and the personnel trained. Any services on the system must be performed by trained personnel as designated by the MAG & More. Damages and resulting service costs resulting from improper handling must be covered by the purchaser.

General: All items sold remain the sole property of MAG & More GmbH until full payment has been received. Important – all shipments must be checked for damages and completeness within 10 days of delivery.

Import: Goods are delivered as HS 9018 9075 by the manufacturer MAG & More GmbH. The country of origin is Germany.

Optional components and setups

NDI Camera Vega

part-no.: 650110

It is possible to upgrade from the Vicra to the Vega camera – which provides an even larger work space for e.g. applications in which the subject is moving.

PowerMAG View! Mobile

part-no.: 940400

Optionally, it is possible to use our functional setup where the stimulator and neuronavigation are offered on one cart – hence reducing the system's footprint, and making it easy to move the entire system when necessary.

PowerMAG View! Table Version

part-no.: 940401

The table version of the View! Neuronavigation provides all the necessary components such as the camera, trackers and software in a budget friendly package. This setup does not include a cart.

Warranty extension and service packages

Depending on your individual requirements and situation, we can offer dedicated warranty extension and service packages which fit your needs, hence ensuring the system reliability for years to come.

TMS training with external clinical experts

In addition to the on-site training with our experienced TMS personnel, we offer trainings with external clinical experts as well. These can range from short video conferences to address TMS questions, to on-site trainings for dedicated topics.

About MAG & More & neurocare group AG

MAG & More has been involved in the field of magnetic neurostimulation since 2002. We have fundamentally taken part in the development of strong and reliable stimulators as well as in the design of new stimulation coils. This experience has given us comprehensive knowledge to answer the needs of our customers in the field of magnetic stimulation.

Our focus lies on creating innovative products which fulfil the highest quality standards. We are truly committed to guarantee the satisfaction of our customers with the quality, functionality and technology of our products and hence we provide our customers with service packages that offer the right solution for their individual requirements.

Behind our innovative products stand highly motivated employees with a great deal of experience, who work with a strong team spirit to meet all the needs of our international customers.

MAG & More has joined forces with the neurocare group in 2021. Neurocare is active in the fast-growing market for neurotherapy, a non-invasive option for mental health, pain and rehabilitation using neuromodulation technologies integrated with psychotherapy. By measuring and modulating brain activity we help clinicians and patients to achieve significant and lasting therapeutic outcomes. We are further specialized in applying neuromodulation techniques (such as QEEG assessments) to improve diagnostics for choosing the right therapy (prognostics). This allows us to personalize treatment to the patient's needs.

Neurocare offers treatment for psychiatric disorders, pain management and rehabilitation via its international network of neurocare clinics. At our neurocare academy we educate professionals, researchers and clinicians in the area of neuromodulation techniques supported by industry-leading technology.
